

Multiple Encounter Dataset Deceased Persons MEDS-II Data Description Document

By Andrew P. Founds

CreateSpace Independent Publishing Platform. Paperback.
Condition: New. This item is printed on demand. 24 pages.
Dimensions: 11.0in. x 8.5in. x 0.1in. This document and
associated dataset is an update to the Multiple Encounter
Dataset I (MEDS-I), originally published by the National Institute
of Standards and Technology (NIST) in May 20101. The MEDS is
a test corpus organized from an extract of submission files of
deceased persons with prior multiple encounters. This paper
describes the basic properties of the images and some relevant
image quality characteristics that pertain to collection
practices and the calibration and evaluation of face
recognition technology. This item ships from La Vergne, TN.
Paperback.

Reviews

This pdf is wonderful. It is definitely simplified but excitement from the 50 percent in the ebook. You wont sense monotony at any time of your time (that's what catalogues are for relating to should you request me).

-- Jaqueline Kerluke

I just started looking at this pdf. It can be rally fascinating throgh studying period of time. Its been printed in an extremely basic way and is particularly only following i finished reading through this publication where in fact altered me, change the way i really believe.

-- Mr. Stephan McKenzie
