*Thorough information! Its such a good study. Sure, it is perform, still an amazing and interesting literature. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Springer-Verlag GmbH Sep 2008, 2008. Buch. Condition: Neu. Neuware - I never heard of Ugli cation, Alice ventured to say. What is it Lewis Carroll, Alice in Wonderland Subject and motivation. The present book is devoted to a theory of multipliers in spaces of differentiable functions and its applications to analysis, partial differential and integral equations. By a multiplier acting from one functionspaceS into anotherS , we mean a function which defines a bounded linear mapping of S into S by pointwise multiplication. Thus with any pair 1 2 of spacesS , S we associate a third one, the space of multipliers M(S S ) 1 2 1 2 endowed with the norm of the operator of multiplication. In what follows, the role of the spacesS and S is played by Sobolev spaces, Bessel potential 1 2 spaces, Besov spaces, and the like. The Fourier multipliers are not dealt with in this book. In order to emphasize the difference between them and the multipliers under consideration, we attach Sobolev's name to the latter. By coining the term Sobolev multipliers we just hint at various spaces of differentiable functions of Sobolev's type, being fully aware that Sobolev never worked on multipliers. After all, Fourier never did either. 614 pp. Englisch.
