Collected Works: Volume I: Scientific Rationality, the Human Condition, and 20th Century Cosmologies (Hardback)

By Andrew Mellon Professor of Philosophy of Science Adolf Grunbaum

Oxford University Press Inc, United States, 2013. Hardback. Book Condition: New. 236 x 162 mm. Language: English . Brand New Book. Adolf Grunbaum is one of the giants of 20th century philosophy of science. This volume is the first of three collecting his most essential and highly influential work. The essays collected in this first volume focus on three related areas. They discuss scientific rationality-the problem of what it takes for a theory to be called scientific, and ask whether it is plausible to draw a clear distinction between science and non-science as was famously proposed by Karl Popper. They delve into the debate between determinism and indeterminism, in both science and in the humanities. Grunbaum defends the position of the Humane Determinist, which then leads to a thorough criticism of the current theological approaches to ethics and morality-where Grunbaum defends an explicit Secular Humanism-as well as of prominent theistic interpretations of twentieth century physical cosmologies. The second volume is devoted to Grunbaum's writings on the Philosophy of Physics and Space-Time, and the third to his lectures on the Philosophy of Psychology and Psychoanalysis, including his 1985 Gifford Lectures, which are to be published for the first time.

Reviews

This book is definitely worth acquiring. I have gone through and so I am certain that I will likely to read through again and again in the future. It's been printed in an exceptionally basic way in fact it is only after I finished reading this publication in which actually altered me, change the way in my opinion.
