By F. Kummer

Springer. Paperback. Condition: New. 179 pages. Dimensions: 8.5in. x 5.5in. x 0.4in. Das Konzept des allergischen Asthma hat lange Zeit so sehr dominiert, da die Immunotherapie vielfach ohne gesicherte diagnostische Grundlage, halbherzig oder ohne die Feinheiten der Allergenvermeidung angewendet wurde. Die Forschung der letzten zehn Jahre hat uns eine derartige Ausweitung unseres Wissenshorizontes beschert, da es an der Zeit schien, maegebliche Autoren zur gemeinsamen Diskussion der neuen Aspekte einzuladen. Das Buch berichtet von den neuesten Erkenntnissen ber zellulres Verhalten, unterschiedliche Zytokinmuster und autoimmunologische Aspekte bis hin zur modernen Allergenvermeidung, aber auch von der wirksamen medikamentsen Therapie der eosinophilen Entzndung The concept of asthma being an allergic disorder only has dominated above others to an extent, that a re-evaluation of this issue in the light of very recent results from research in immunopathology seemed more than overdue. This volume provides a current concept of theory and clinical practice of immunopathology and therapy of asthma, comprising extensive and brand new laboratory data on atopy, intrinsic asthma, aspects of autoimmunology, as well as guidelines for allergen avoidance, immunotherapy and - last not least - pharmacological treatment of eosinophilic inflammation.
